InkTank

1 COLOURS

The tattoos uploaded to InkTank are the feature - colour usage for the rest of the InkTank platform should be minimal in order not to distract or draw attention from these images. White backgrounds will allow these images to stand out.

Pops of orange aim to spark the emotions of joy, excitement and optimistic anticipation for users, positively reinforcing their use of InkTank to help find inspiration for and plan their next tattoo. This colour should be used where the app is needing to draw the users' attention (eg. Buttons)
A dark grey background for menus will balance the brighter orange, providing a neutral and balanced base.

4 TONE OF VOICE

Users of InkTank should feel like they are getting advice from a friend - language and tone of voice should be casual, friendly, straightforward and simple.
5 ACCESSIBILITY

Contrast

Use contrasting colours for text on coloured backgrounds as shown.

6 ICONOGRAPHY

Icons should be bold, simple, black and use natural shapes. Users should be able to easily recognise what icons represent a what their use is. Simple graphics will stand out without adding visual clutter to screens.

7 ILLUSTRATIONS

As with icons used, illustrations created for InkTank should be graphic, bold and simple. If coloured in, illustrations should have solid black outlines. Outline illustrations should use heavy lines, and can use any complimentary colour from the InkTank colour palette. Illustrations are to be used in onboarding and on menus only. Where possible, lines and edges should be rounded and 'cartoon' like.
